

Figure S4

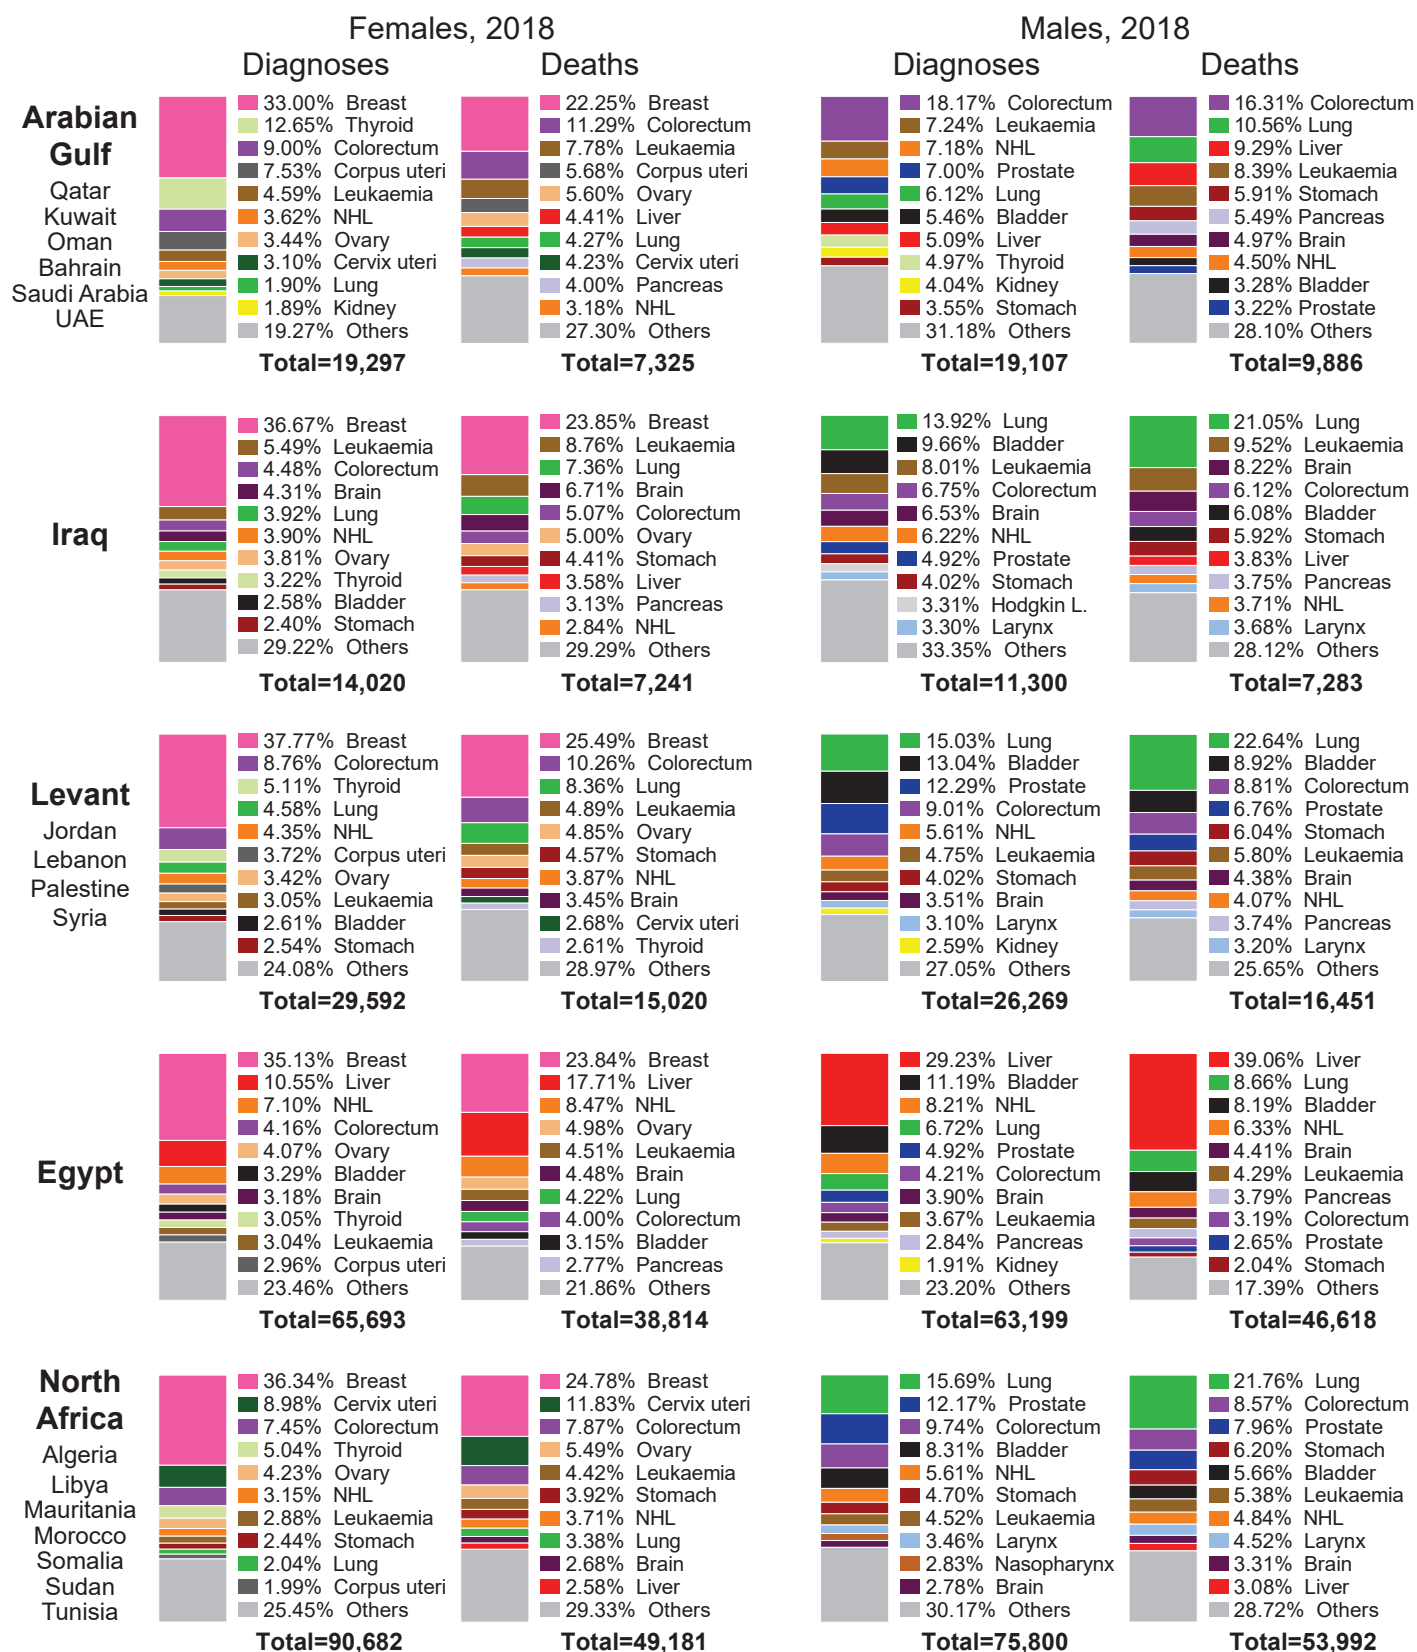

Figure S4: Leading cancers for diagnosis and cancer-related deaths in subregions of the Arab countries. The percentage contribution of cancer sites to all cancers in females or males are shown for the 10 leading sites for cancer diagnoses and mortality in 2018 at all ages in the specified Arab subregions. The total number of diagnoses or deaths are shown under each plot. Complete data for all cancer sites in all subregions, in each country, and data for the USA, Europe and the world are available in Tables S1-S2.
